

Safety Net Profiles for Key Texas Public Hospitals within their Respective Counties

Hospital	% of County Uncompensated Care Costs	% of County Medicaid days	% of County Medicaid discharges	% of County Medicare days	% of County Medicare discharges
JPS Health Network (Fort Worth)	45.4%	23.3%	22.7%	4.5%	4.7%
All Other Tarrant County Hospitals (39 reporting)	54.6%	76.7%	77.3%	95.5%	95.3%
Parkland Health & Hospital System (Dallas)	60.1%	46.3%	30.4%	6.6%	4.5%
All Other Dallas County Hospitals (46 reporting)	39.9%	53.7%	69.6%	93.4%	95.5%
Harris Health System (Houston)	52.3%	8.1%	12.9%	1.0%	1.9%
All Other Harris County Hospitals (66 reporting)	47.7%	91.9%	87.1%	99.0%	98.1%
University Health System (San Antonio)	45.6%	18.4%	15.5%	5.9%	5.7%
All Other Bexar County Hospitals (25 reporting)	54.4%	81.6%	84.5%	94.1%	94.3%

The above summary provides a high-level view of the safety net profiles for JPS, Parkland, Harris Health System, and University System within their respective counties of Tarrant, Dallas, Harris and Bexar. Data was obtained from the American Hospital Association (AHA) database. It should be noted that financial data is from each hospital's most recently reported year to the AHA and that the AHA database is continuously refreshed as hospitals provide updated information. In general, all four public hospitals listed above are providing slightly more or less than 50% of the total uncompensated care cost in their respective counties, and each is serving a far greater percentage of Medicaid patients than Medicare patients. Both sets of percentages, however, are impacted by the total number of reporting hospitals in the applicable county.
