

Fort Worth Genealogical Society Footprints Consolidated Surname Index 1958-1997

Introduction:

This index was compiled from images of the indexes found in the final quarterly of each year. These images were converted to text by a computer using an Optical Character Reader (OCR). Some of the originals were old and of rather poor quality. We apologize for any errors that may be found in this index. Keep in mind that this is an aid to help locate names, and in case of question you can look it up in the original image index at the end of each volume.

The technique used was to add the year in Parenthesis at the end of each name as found in the original index. These indexes were then combined and sorted to give the names in alphabetical order.

To find a name click on find on the toolbar or press Ctrl+F. Type in the name you are seeking. When the name is found. Click the scroll button on the main menu and look for the specific instance of the name. Then click file and open the desired year to open the image file for that year.. When the file is open go to the desired page.. The instructions for going to page locations are given in the "Readme" file on the CD. This file can be read by most any word processor including word Notepad and Wordpad.
