TARRANT COUNTY
Security Access Control System

An access control system is installed in multiple Tarrant County buildings to enhance overall security by restricting entry to unauthorized individuals. It will also provide a centralized manageable way to control who can access specific areas. This helps prevent unauthorized access and reduces the risk of security breaches.

Tarrant County has implemented a badge policy to provide a framework for consistent decision-making, streamline operations, ensure compliance and promote accountability. This help individuals understand expectations, reduce errors, and maintain a positive work environment. The County Administrator supervises the implementation of this policy.

Tarrant County Facilities Management, Human Resources and the Sheriff's Office are the authorized issuing offices. Only the Commissioner's Court may add other authorized issuers after approval of the current policy.
