INTENSE PLUS SERVICE LEVEL is designed to address chronically serious to severe emotional and/or behavioral management problems that interfere with the child's ability to function in a family, school, or community setting outside of a therapeutic environment. Children at this level do not generally function socially in an appropriate manner and have emotional functioning that is largely incongruent with chronological age. Additionally, children at this level frequently have serious to severe outbursts that make it difficult for them to participate in routines or to accept responsibility for their behavior.

Additional detailed information, including the characteristics and history of children requiring this level of service that make treatment at a lower service level unsuccessful, may be found in the Texas Administrative Code, Title 40, §700.2365 and §700.2367.
